

PRODUCTS FOR PUBLIC TRANSPORT SYSTEMS

RAILWAY TRACK RECORD

Ever since its formation in 1938, MOSER-BAER AG has been the sole supplier of railway station clocks and time systems for the Swiss federal railways SFR, providing accurate time displays for hundreds of railway stations all over the country.

Over the years, the brand MOBATIME has established itself in public transport systems around the world, be it stations of the Trans-Siberian Railway in Russia, national railways in Germany, Italy and the Netherlands or high speed railways in Saudi-Arabia, Hong Kong and Taiwan.

MOBATIME stands for accuracy, reliability and flexibility. We offer the entire range of time-related products - analog and digital clocks of every size, time servers and master clocks for big and small networks as well as switch relays for building automation.

All products are available in standard and consumer-specific versions.

WORLDWIDE APPLICATIONS

MOBATIME products are used by railway companies in over 20 countries. This map shows some examples of MOBATIME solutions in use.

SWITZERLAND

ITALY

GERMANY

NETHERLANDS

INDIA

TAIWAN

CANADA

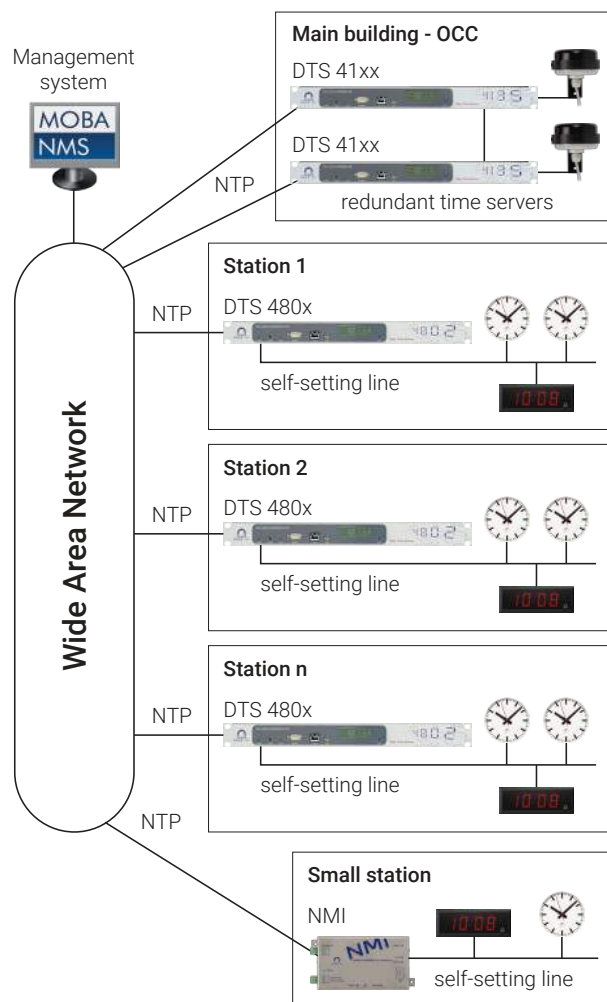

COLOMBIA

RUSSIA

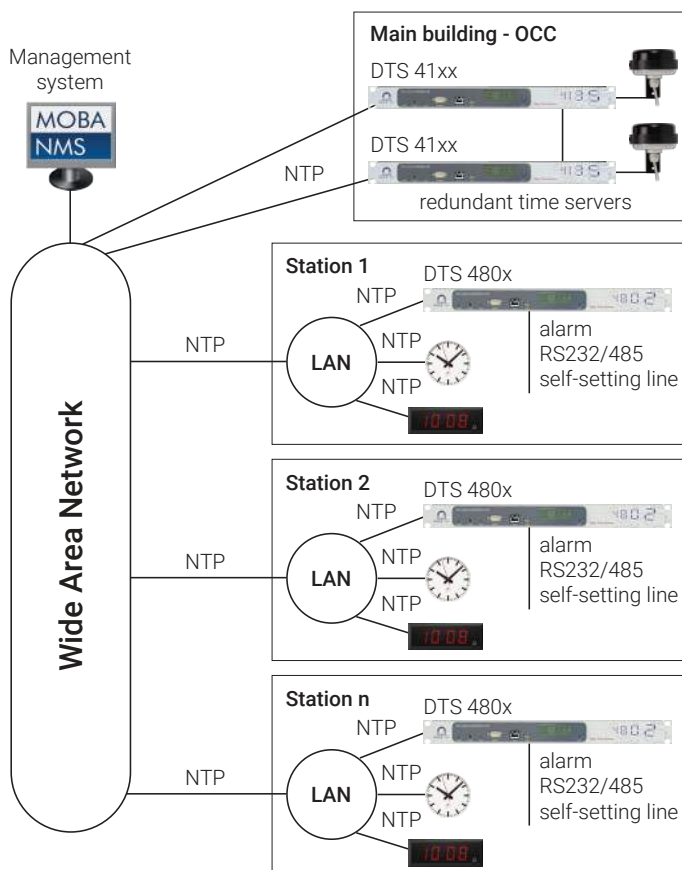

SOLUTIONS

Mixed self-setting time system

Pure LAN time system

With our wide range of product options, MOBATIME is sure to fulfill all your time display needs.

Network synchronization

- GPS (GPS 4500)
- GLONASS (GNSS 3000)
- NTP server

Device control and monitoring

- Time servers (e.g. DTS 4132)
- Master clocks (e.g. DTS 480x)
- Network interface (NMI)

Time display

- Analog single- or double-sided clocks, Ø 250-1000mm
- Digital single- or double-sided clocks, digit height 18-500mm
- Analog facade clocks, Ø 0.6-3.5m

Building automation

- Programmable relays for illumination control etc.

Individual solutions

- Customized master time sources, analog and digital clock designs
